

Background

The Creek is a 1923 Charles Blair Macdonald design abutting the Long Island Sound on the north shore of Long Island, located 45 minutes from New York City. The unique links course offers a blend of seaside, inland and parkland holes. A complete golf course restoration, under the direction of Gil Hanse, as well as a new irrigation system will commence in July of 2017. All greens and fairways will be re-grassed, all bunkers and tees rebuilt, and several architectural features will be restored. This is a tremendous opportunity for the right individual to be involved with such an extensive golf course restoration project.

Education/ Experience

Enrolled in a 2 or 4 year program in turfgrass management or related field.
